

**Welcome to LoneStar Tracking! Thank you for choosing LST to help you monitor your assets 24/7 from any smart**

We recommend professional installation of the Scorpion LTE.

The Scorpion LTE has several inputs and outputs that can be used for different purposes. This guide will show you how to connect your iButton

Your iButton receiver will have two wires, a Red and White. Connect the RED wire from the iButton receiver to the GREEN wire on your GPS tracker. Next, connect the WHITE wire from your iButton receiver to a vehicle ground.
